

TG 25 Stainless steel

RITTER DATA SHEET

Technical Drawing

Legend

1. Handle
2. Support unit for:
 - > Thermometer gas
 - > Thermometer packing liquid
 - > Manometer
3. Level
4. Removable cover
5. Pulse generator port (option)
6. Manometer connection
7. Gas inlet
8. Filling nozzle
9. Rear plate, detachable
10. Gas outlet
11. Liquid level indicator
12. Drainage faucet
13. Levelling foot

Performance Data

Minimum flow Q_{\min}	50	ltr/h
Standard flow Q_{standard}	5,000	ltr/h
Maximum flow Q_{\max}	7,000	ltr/h
Measurement accuracy at standard flow	0.2	%
Measurement accuracy across measuring range	0.5	%
Measuring drum volume	25	ltr/U
Packing liquid quantity, approx	39	ltr

Maximum gas inlet pressure ⁽¹⁾	500	mbar
Minimum differential pressure ⁽²⁾	0.1	mbar
Minimum dial division	0.1	ltr
Maximum indication value ⁽³⁾	999,999,990	ltr
Connection gas in/outlet	hose barb	
Inside-Ø hose barb	17.2	mm
Outside-Ø hose barb	33	mm

⁽¹⁾ Standard version: 500 mbar – special version also available for 1 bar

⁽²⁾ Differential pressure (= pressure loss) gas inlet gas outlet

⁽³⁾ Standard Totalizing Roller Counter

Models (materials)

Model	Casing	Measuring drum	Width	Height	Depth	Weight (without packing liquid)	Max. constant use temperature
1	Stainless Steel	PVC-grey	517 mm	560 mm	645 mm	38.0 kg	40 °C
2	Stainless Steel	PE-el	517 mm	560 mm	645 mm	37.6 kg	60 °C
3	Stainless Steel	PP-grey	517 mm	560 mm	645 mm	37.6 kg	80 °C
4	Stainless Steel	PVDF	517 mm	560 mm	645 mm	38.8 kg	80 °C

Caution: Before and after measurements with oxygen purge the meter with an inert gas to avoid the danger of explosion! For chemical resistance properties please contact your RITTER distribution partner!

Standard Equipment

- › Multi-Chamber Measuring Drum
- › Magnetic coupling between measuring drum and counter (for an absolutely liquid-tight casing)
- › 8 or 9-digit Totalizing Roller Counter
- › Large One-needle Dial
- › Supports for Thermometer and Manometer
- › Viton sealing
- › Level and Levelling Feet
- › Bubble level for levelling

Built-in Options

- › **LCD Display**, resettable, 8-digit (replaces Totalizing Roller Counter)
- › **Pulse Generator**, standard or Ex-proof version (for connecting Electronic Display Unit/Computer)
- › **High Precision Packing Liquid Level Indicator »HPLI«**, for packing liquid level

Accessories

- › **Software »RIGAMO«**
- › **Thermometer Gas (TG)**, measuring range 0 °C to +60 °C
- › **Thermometer Packing Liquid (TG)**, measuring range 0 °C to +60 °C
- › **Manometer for pressure $p_{max} \leq 1 \text{ bar}$** , measuring range 0-600 mbar
- › **Electronic Display Unit »EDU 32 FP«**, displays volume and calculates flow rate via RS232 and analog-output in realtime (pulse generator required)

V 3.1 / Rev. 2024-02-07 / Subject to alterations.
