

## Certificate of Compliance for Repair & Recalibration of Gas Meters

Your project no.:

Gas Meter Type:

Serial-No.:

For the health protection of our employees and according to legal regulations for accident prevention and environment protection we are obligated to ask for the following information:

- Which gas(es) has (have) been measured with the gas meter at last?

---

- What was the estimated concentration of the measured gas(es)?

---

Please note that we can only repair gas meters which are carefully purged / neutralised before sending to RITTER so that any danger for health and environment is excluded.

**We hereby confirm that any danger for health and environment by emitting gases from the gas meter is not possible during the repair / recalibration of the above-stated gas meter.**
